### Android RecyclerView not showing images or text on fragment

java

android

android-fragments

android-recyclerview

I am trying to follow an online tutorial to build a RecyclerView on a fragment and then load images and text into cards. I am getting an error:

com.example.gena E/RecyclerView: No adapter attached; skipping layout

The code below is the fragment

```

package com.example.gena;
import android.os.Bundle;
import android.view.LayoutInflater;
import android.view.View;
import android.view.ViewGroup;
import androidx.fragment.app.Fragment;
import androidx.recyclerview.widget.DefaultItemAnimator;
import androidx.recyclerview.widget.GridLayoutManager;
import androidx.recyclerview.widget.RecyclerView;
import java.util.ArrayList;
import java.util.List;

public class ApprenticeFrag extends Fragment {

    private RecyclerView recyclerView;
    private ApprenticeAdapter adapter;
    private List<ApprenticeData> mApprenticeList;
    private ApprenticeData mApprenticeData;

    public ApprenticeFrag() {
    }

    @Override
    public void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
    }

```

The additional feature of this project is that unseen questions are marked and you can simply find questions that you have not read them before. This is done simply by storing the id of questions in the local storage.
